

MANIVEL R

Aspiring Cybersecurity Professional & Ethical Hacker | CTF Player | AI & ML Undergraduate

[LinkedIn](#) | [GitHub](#) | mr.manivel.r@gmail.com | +91 7825039006 | Tiruchirappalli, Tamil Nadu

PROFESSIONAL SUMMARY

Computer Science (AI & ML) undergraduate specialising in web application security and ethical hacking. Hands-on with Kali Linux, Burp Suite, Nmap, and Python — with real CTF experience and a growing research interest in AI-driven cybersecurity. Currently completing a cybersecurity internship focused on penetration testing, vulnerability scanning, and incident response. Actively seeking opportunities in security operations and offensive security.

EXPERIENCE

Cybersecurity & Ethical Hacking Intern

ApexPlanet Software Pvt. Ltd. | Jun 2026 – Aug 2026

- Configured a professional hacking lab with Kali Linux and vulnerable machines (Metasploitable2, DVWA).
- Conducted comprehensive network reconnaissance, vulnerability scanning (OpenVAS), and packet analysis (Wireshark).
- Exploited OWASP Top 10 vulnerabilities and implemented mitigations like Prepared Statements and CSP.
- Executed penetration testing workflows and system hardening procedures, including malware analysis basics.
- Culminated in a Capstone Project simulating an Incident Response scenario.

CYBERSECURITY SKILLS

OS & Environment: Kali Linux (primary), Linux CLI, Bash Scripting

Security Tools: Nmap, Burp Suite, Wireshark, Netcat, Metasploit, OpenVAS

Concepts: OWASP Top 10, Web Application Security, OSINT, CTF Methodology, Penetration Testing

Practice Platforms: TryHackMe, Hack The Box (HTB)

PROJECTS

CyberRecon Agent — Python, Google ADK, Nmap, Gemini API, MCP · 2026

- Python-based recon and reporting workflow built for the Kaggle Vibe Coding Capstone.
- Combines Google ADK, MCP, Nmap, and Gemini API integration to automate the first pass of network reconnaissance and produce a clean markdown security report.

AdaptShield — Python, AI/ML · Ongoing Research

- Adversarial self-learning firewall with a Red Agent (AI attacker) and Blue Agent (AI defender) in a closed adversarial loop.
- Focused on adaptive threat detection and autonomous defense response; currently in active prototype development.

SecureLearn Agent — Python, Google ADK, Gemini API, MCP · 2026

- AI-powered cybersecurity education assistant addressing three core learner pain points: structured learning paths, CTF guidance, and progress tracking.
- Built as a multi-agent system with four specialised sub-agents — CurriculumAgent, CTFHintAgent, QuizAgent, and PersonalizationAgent — orchestrated via Google ADK and Gemini API.
- Delivered through an interactive CLI and MCP server, tracking user progress natively to provide adaptive, personalised guidance through ethical hacking topics.
- Developed for the Kaggle Vibe Coding Capstone 2026.

CTFs & COMMUNITY

DCG CBE CTF 2026 · April 17, 2026 · KCT, Coimbatore

- Competed against 500+ teams; ranked 90th (top 18%). Solved web and security challenges under competitive conditions.

DCG Coimbatore Chapter Meetup 2026 · April 18, 2026 · KCT, Coimbatore

- Attended cybersecurity sessions and networked with industry professionals at the DEF CON Group Coimbatore chapter event.

EDUCATION

B.E. – Computer Science Engineering (AI & ML) | Expected: 2028

University College of Engineering, BIT Campus, Anna University, Tiruchirappalli

CERTIFICATIONS

Cisco Networking Academy — Linux Unhatched

TECHNICAL SKILLS

Programming: Python

Dev Tools: Git, GitHub, MS Office

Languages: English, Tamil
